

"Thiaoouba Prophecy"

("Abduction to the 9th Planet")

of Michel Desmarquet

This may seem as a fairytale - but read it all, and you will recognize a lot of wisdom. If this is all a fabricated story - it is though filled with ancient and spiritual knowledge and wisdom of a remarkable kind. And their claim to be hermaphrodites (and much more here) fits with the spiritual science of Martinus - from his very deep wisdombooks from almost a century back.

This is from the book "Thiaoouba Prophecy" - about a direct contact to a superhuman race of nice-looking giants that happened in 1987 in Australia - when then 58-year-old Michel suddenly got a thought of leaving bed half past twelve in the night - then writing a message to his wife that he would be far away for ten days. He then left the house and was soon taken aboard on a big ship.....

It took many years before he succeeded in getting the book out. He says he got special help from the ETs in remembering the incident and in the writing of the book.

"Believing is not enough... You need to KNOW"
